

NHM Alive

By: Tour Group JAM Alive

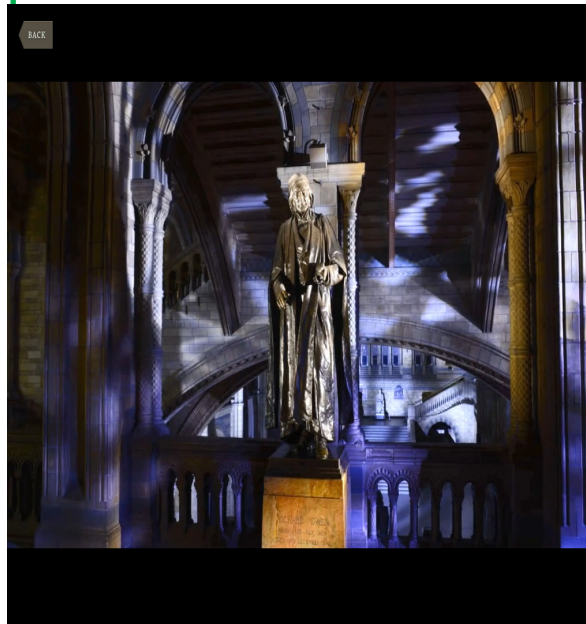

Visit the museum or the app.

Address: Cromwell Road
London SW7 5BD

NHM Alive history

Richard Owen was a very great scientist in his time. He built the NHM Alive Museum, and found the Archaeopteryx fossil.

Exhibits

There are many exhibits in the NHM Alive Museum such as the Giant Moa, Dippy, Archaeopteryx, Sabre Toothed Cat, etc. You can go on Night Mode, or you can go on Day Mode. It is a great place and app!

Night Mode

On Night Mode, you can choose from a couple different things. You can go to the tags, which are facts about the animal. You can also go to the photo library, which has different pictures about the animals. The last thing is the security camera, which is a picture of the security room.

Day mode

On Day Mode, you can find a map of the museum, facts about different animals, and a timeline. Also, on the bottom, there is a button that says Natural History Museum. If you do that, It tells about the museum.
